

Aditya Yarramsetty

SENIOR DATA ENGINEER

📞 +44 7918 311776 | ✉️ adityaowb.uk@gmail.com | 📱 adi96000 | 🏠 [aditya-yarramsetty-23810ab6](#) | 📍 Milton Keynes, UK

Senior Data Engineer with 9+ years designing and scaling enterprise data platforms across cloud and on-prem environments. Specialised in building high-volume ETL/ELT pipelines and cloud-native data infrastructure using Snowflake, DBT, Apache Airflow and AWS/Azure, with a strong focus on data quality, validation and observability. Experienced in designing metadata-driven and test-driven (TDD) pipeline frameworks, structured data models for analytics and reporting, and automating infrastructure with Terraform. Comfortable working close to Data Scientists and product teams to turn large real-world datasets into reliable, production-grade analytics platforms. Proficient in Python, PySpark and CI/CD (GitHub Actions, Jenkins), with growing exposure to streaming/event-driven data (Kafka) and AI-assisted data tooling.

Work Experience

OCS Consulting UK | Motability Operations

Borehamwood, UK

SENIOR DATA ENGINEER

Jun. 2021 — Current

- Designed and delivered scalable **Snowflake**-based data warehouse solutions, improving reporting efficiency and cutting report generation time by **40%**
- Built and automated real-time and batch ingestion pipelines using **Snowpipe**, **Apache Airflow** and **AWS S3**, ensuring continuous, reliable data availability
- Developed transformation models in **DBT** with YAML-based test frameworks, enforcing data quality, validation and governance standards across Snowflake
- Designed **metadata-driven, test-driven (TDD)** pipeline frameworks to maximise reusability and standardisation across workflows
- Developed **AWS Lambda** functions in **Python** for near real-time ingestion and transformation of API/JSON data
- Deployed and automated cloud infrastructure with **Terraform** and **CI/CD** pipelines (Jenkins, Bitbucket, GitHub Actions), reducing manual release effort
- Implemented enterprise-wide **Snowflake RBAC**, row-level security and cost/performance monitoring across accounts and warehouses
- Partnered with analysts and product teams to build and maintain core analytical datasets, improving data reliability and accessibility
- Conducted database performance tuning through partitioning, indexing and SQL query optimisation, improving processing speed by up to 35%
- Enforced dynamic data masking policies in Snowflake to strengthen compliance and data security

Oracle Corporation

Bangalore, India

SENIOR APPLICATIONS ENGINEER

Feb. 2016 — Mar. 2021

- Implemented **CDC** and **SCD** strategies and multi-file ingestion frameworks to support large-scale data integration
- Established data quality safeguards and error-handling protocols across **ETL** pipelines, ensuring reliable, validated production data loads
- Designed **Star/Snowflake** schema data models within OBIEE, improving reporting efficiency and semantic layer design
- Designed file-to-database architecture and implemented multi-file ingestion frameworks, streamlining large-scale data integration processes
- Optimized performance in Oracle Data Integrator (ODI) and database environments through advanced tuning techniques, reducing processing times and resource consumption
- Managed code migration and deployment across multiple environments, ensuring version control and consistency in releases

Varite India Pvt Ltd

Bangalore, India

INFORMATICA ETL DEVELOPER

Sep. 2014 — Feb. 2016

- Developed and optimized **ETL** workflows and mappings in **Informatica PowerCenter**, ensuring reliable and efficient data integration
- Designed and implemented **Slowly Changing Dimensions (SCD)** and **Change Data Capture (CDC)** strategies for accurate historical and incremental data loads
- Applied advanced performance tuning techniques including pushdown optimization, partitioning and indexing, improving processing efficiency and throughput

Education

Anna University

Chennai, India

M.E. IN ELECTRONICS AND COMMUNICATIONS

2013

JNTU University Hyderabad

Hyderabad, India

B.TECH. IN ELECTRONICS AND COMMUNICATIONS

2011

Skills

Cloud Data Platforms	Architecture and operation of scalable cloud data platforms on AWS and Azure
	Snowflake warehouse design, cost/performance monitoring, RBAC and data masking
Data Engineering	Design of large-scale ETL/ELT pipelines and production data infrastructure
	Oracle Data Integrator, DBT, Informatica PowerCenter, Snowpipe real-time ingestion
Software Engineering	Python development for data processing and automation (AWS Lambda, PySpark)
	Test-driven development (TDD), DBT YAML-based testing, data validation frameworks
Workflow Orchestration	Apache Airflow for scheduling, monitoring, and dependency management
	Metadata-driven pipeline design for reusability and standardisation across workflows
Infrastructure & DevOps	Infrastructure-as-Code with Terraform, CI/CD pipelines (Jenkins, Bitbucket, GitHub Actions)
	Schema migration automation (Flyway), release management, version control
Data Modelling & Governance	Star and Snowflake schema design for analytics and reporting
	Data quality, integrity and observability; enterprise-wide access and compliance policies

Certifications

Snowflake SnowPro Core	Snowflake — 2023
AWS Certified Cloud Practitioner	Amazon Web Services — 2024
Microsoft Certified: Azure Fundamentals	Microsoft — 2024
Oracle Cloud Infrastructure Foundations Associate	Oracle — 2024
Oracle Cloud Data Management Foundations Associate	Oracle — 2023
Apache Airflow 3 Fundamentals	Astronomer — 2026
DAG Authoring (Airflow 3)	Astronomer — 2026

AI& Emerging Technology

AI-Assisted Development	Used Claude Code to deliver forecast/statistics web reporting for an internal application, completing an estimated 4-month build in one month with no prior .NET or Java experience
	Used Claude and ChatGPT to generate data validation and unit tests for DBT models, and to support Power BI report development
Semantic Search	Implemented semantic search over a client dataset using Snowflake Cortex Search
